

Jamia Masjid Ghousia Mosque, Armley Leeds - Wash Troughs

Pland Stainless was delighted to be chosen to supply stainless steel products to a new Mosque that's being designed, built and paid for by the local Muslim community in Armley, Leeds, West Yorkshire.

The specified product was a bespoke multi-faith wash trough, used for performing ablution (Wudu) washing before prayers and it was supplied with seating and taps for both the male and female areas in the Mosque. The product planning and design team at Pland Stainless worked closely with the building Project Manager, Mr Ishtiaq Hussain, to create this bespoke product in stainless steel along with hand wash basins and drinking fountains.

Established in 1919 Pland produces quality stainless steel products for the Commercial market.
