Product Detail

Product: Trent
Code: TP1082

Issue: 1
Date: 24/11/15

Product description:

Trent is a basin mounted touch sensor tap. It is available with battery or mains operated power time control. The self-closing fitting avoids the risk of taps being left on and together with that allows the user to open and close the faucet according to their needs. With a 8 second factory preset, installation or maintenance staff can easily change this time manually according to the needs of the user. Running time adjustment is not accessible to the end users. Water will start to flow when the user touches the upper cap and will run for 8 second or until the user presses the cap again. Filter included.

Product:
