Planet: Base Units

Product Detail

| Product:	Planet	Issue:	1
Code:	600HSL	Date:	19-09-16

Product description:

Planet stainless steel Hinged Cupboards measure 530mm, allowing a 90mm services gap at the rear of the installation. Units are available in five standard widths, 450mm, 600mm, 900mm, 1200mm and 1500mm. Adjustable feet allow height adjustment between 880mm and 910mm working height. Planet can be configured exactly as required. Available in a choice of six standard colours Arctic White (RAL 9016), Forest Green (RAL 6005), Ivory (RAL 1015), Regatta Blue (BS 4800 18E53), Paprika Red (BS 4800 04E53) and Claret (RAL 3005). Planet can also be supplied with bespoke epoxy coating finishes or with all stainless steel construction. Available with lock if required.

Technical Detail:

MATERIALS
Panels:	<304> 1.4301 Stainless Steel 1.2mm
Or	
Panels:	Zintec / Powder Coated
Frame:	<430> 1.4016 Stainless Steel
Hinges:	Zinc Plated
Feet:	Aluminium
Locks:	Cam / Stainless Steel / Chrome Plated / Nickel / 2 Keys

Care Of Your Product

HANDLING AND FIXING CAUTION
Take care when handling and fixing this product. Exposed edges of the stainless steel, including tap holes, upstand, overflows and wastes etc. may cause harm if handled without due caution. When using the fixing clips supplied with inset sinks avoid touching the two prongs on the area of the clip that grips the underside of the worktop.

TO THE STOCKIST
Please store products in a cool, dry area.
Sinks should, where possible be stood on their ends supported by battens with the bowl uppermost.
If sinks are nested with bowls inside one another, place some dry cushioning material between them to protect the surfaces.

TO THE INSTALLER
DO handle with care to avoid scuffs and scratches during installation.
DO check that edges of sinks are dead level so that water will flow off the draining board.
DO NOT over-tighten plumbing or other mechanical fixtures.
DO NOT remove the plastic protective film applied to certain products until all installation work has been completed.
DO NOT stand/kneel on the drainer of sinks.
DO NOT drop mortar, plaster or similar substances onto the stainless steel.

TO THE USER
Stainless steel will give you a lifetime of trouble free use as long as you follow a few simple rules. If it appears to mark, don't worry, it is usually not the steel, but something deposited on it, which has caused the apparent stain.
DO - wash the product before use.
DO - clean the product regularly, using JIF, Goddard's, or similar recommended cleaners. Follow the manufacturer's instructions carefully. Always rinse well with clean water and dry the surface with a soft cloth.
DO - use nylon or bristle brushes, not metal scrapers or wire brushes to loosen stubborn stains.
Never use wire wool pads, as they can scratch the steel.
DO - take care when handling sharp objects as they can scratch the surface of the steel. Any scratches will blend together over a period of time and become less noticeable with age. There is no detriment to the corrosion resistance or general performance of the material.

DO NOT - allow undiluted bleach to remain in contact with stainless steel (remember dishwasher powders, sterilising agents and similar products all contain chlorides). Black pit marks can result and permanent damage can be caused. Dilute to manufacturer's instructions and always rinse with clean water.
DO NOT - soak clothes in bleach solutions for long periods. Always rinse bowl with clean water after use.
DO NOT - leave such substances as Mortar, Grouting cement, soldering flux, photographic developing fluids, silver dip, denture liquids or food acids on the surface of the steel. Clean immediately and rinse well with clean water.
DO NOT - allow corrosive foodstuffs, such as fruit juices, damp salt, vinegar, mustards, pickles and mayonnaise to remain on the surface of the steel for long periods. Wash and rinse away.
DO NOT - let hard water cause a build-up of lime or chalk deposits which can sometimes be seen as a greyish film. Clean regularly with recommended cleaners to avoid this problem and always wipe dry with a soft cloth.
DO NOT - worry if the steel appears to rust. Usually it's deposits of wire wool scouring pads, plumbers swarf, particles from rusting storage tanks or other deposits on the surface which can be cleaned and rinsed away following your usual cleaning procedure. Bases of washing up bowls can harbour such deposits – check regularly.
DO NOT - use coarse grit cleaners or wire wool pads when cleaning the steel. They will scratch the surface.
DO NOT - leave carbon steel objects such as bottle openers, scissors, whisks and other kitchen objects standing on the surface for long periods, they can rust and leave marks.

DO PLEASE ENJOY YOUR NEW STAINLESS STEEL PRODUCT

Pland

Cleaning Regime

Problem	Corrective Treatment	Comments
Routine Cleaning.	Washing up liquid, all-purpose cleaning liquid, swab with cloth or sponge rinse well.	Satisfactory on all surfaces.
Oil & Grease Marks.	Degreasing fluid or cellulose thinners.	Rinse with soap & water.
Stubborn marks, stains and light discoloration.	Mild abrasive creams (Sif / Shiny sinks).	Heavy stains can be loosened by soaking with Metsoak or Hi-Phos. Rinse thoroughly after soaking as these products cause rust type marks if left.
Heavy discoloration or heat tint.	Use metal polish (Brasso, Goddard's S/S Cleaner, Bar Keepers Friend) or a light non-metallic abrasive pad. Dura glit.	Use only on grain finish surfaces and work in direction of grain as slight scratching will occur.
		Bleach solutions including over the counter brands must only be used in dilution as instructed and thoroughly rinse immediately after application as chloride containing compounds will cause corrosion on all grades of stainless steel.
		Rinse thoroughly after application and wipe dry as rust type stains can result if left undiluted on surface
Lime Scale	Apply descaler as instructed, agitate & allow to soak, re apply if not fully removed. (Met-soak DX4920 or Hi-Phos)
