Data File

### Product Detail

Product: Malvern  
Code: SAN055A-CGFBU

Issue: 1  
Date: 13/01/26

#### Product description:

Malvern is an adult floor mounted drinking fountain. Complete with Glass Filler with the option of a Bubbler Tap (BU) or both (GFBU). The addition of the full-length shroud gives the advantage of both supply and waste pipe work concealed for a clean looking installation.

This antivandal unit features a concealed bottle filler with perforated drip tray and waste.

#### Malvern tap options:

Chrome plated bubbler tap - TP1012-1 Chrome plated glass filler - TP1102-1

#### Product: Code:

Malvern	SAN055A
Malvern	SAN055J
Malvern	SAN055W
Malvern	SAN055A-CGFBU

#### Technical Detail:

Material:	<304> 1.4301
Gauge:	1.2mm Satin
Finish:	Polished 3/8" 1
Inlet:	1/4" Wall / Floor
Outlet:	
Fixing:

## Malvern: Adult Drinking Fountain

### Installation Detail

1. Remove all packaging materials.
2. Offer the drinking fountain up to the wall in the desired position and mark a line level with the top of the drinking fountain and on the floor either side of the shroud.
3. Offer the joggle strip up to the wall 2mm below the line marked on the wall, ensure the joggle strip is level and mark through the holes in the joggle strip.
4. Position the floor bracket central between the marks on the floor with the rear edge touching the wall.
5. Drill holes suitable for wall/floor fixings (Not Supplied).
6. Fit the Joggle Strip and the Floor Bracket using suitable fixings (Not Supplied).
7. Remove the Shroud from the fountain.
8. Connect the bubbler and waste to the drinking fountain. Leak check all connections.
9. Connect the drinking fountain to the site plumbing.
10. Push the shroud into position around the floor bracket. Secure the shroud in place using the M6 machine screws provided.
11. Hang the fountain back on the joggle strip and secure it to the shroud using the M6 machine screws supplied.
12. Ensure all connections are secure and the unit is functioning correctly. The installation is now complete.

#### Care Of Your Product

##### HANDLING AND FIXING CAUTION

Take care when handling and fixing this product. Exposed edges of the stainless steel, including tap holes, upstand, overflows and wastes etc. may cause harm if handled without due caution. When using the fixing clips supplied with inset sinks avoid touching the two prongs on the area of the clip that grips the underside of the worktop.

##### TO THE STOCKIST

Please store products in a cool, dry area.

Sinks should, where possible be stood on their ends supported by battens with the bowl uppermost.

If sinks are nested with bowls inside one another, place some dry cushioning material between them to protect the surfaces.

##### TO THE INSTALLER

**DO** handle with care to avoid scuffs and scratches during installation.

**DO NOT** check that edges of sinks are dead level so that water will flow off the draining board.

**DO NOT** over-tighten plumbing or other mechanical fixtures.

**DO NOT** remove the plastic protective film applied to certain products until all installation work has been completed.

**DO NOT** stand/kneel on the drainer of sinks.

drop mortar, plaster or similar substances onto the stainless steel.

**TO THE USER** Stainless steel will give you a lifetime of trouble-free use as long as you follow a few simple rules. If it appears to mark, don't worry, it is usually not the steel, but something deposited on it, which has caused the apparent stain. **DO** - wash the product before use. **DO** - clean the product regularly, using JIF, Goddard's, or similar recommended cleaners. Follow the manufacturer's instructions carefully. Always rinse well with clean water and dry the surface with a soft cloth. **DO** - use nylon or bristle brushes, not metal scrapers or wire brushes to loosen stubborn stains. Never use wire wool pads, as they can scratch the steel. **DO** - take care when handling sharp objects as they can scratch the surface of the steel. Any scratches will blend together over a period of time and become less noticeable with age. There is no detriment to the corrosion resistance or general performance of the material.

**DO NOT** - allow undiluted bleach to remain in contact with stainless steel (remember dishwasher powders, sterilising agents and similar products all contain chlorides). Black pit marks can result and permanent damage can be caused. Dilute to manufacturer's instructions and always rinse with clean water.

**DO NOT** - soak clothes in bleach solutions for long periods. Always rinse bowl with clean water after use.

**DO NOT** - leave such substances as Mortar, Grouting cement, soldering flux, photographic developing fluids, silver dip, denture liquids or food acids on the surface of the steel. Clean immediately and rinse well with clean water.

**DO NOT** - allow corrosive foodstuffs, such as fruit juices, damp salt, vinegar, mustards, pickles and mayonnaise to remain on the surface of the steel for long periods. Wash and rinse away.

**DO NOT** - let hard water cause a build-up of lime or chalk deposits which can sometimes be seen as a greyish film. Clean regularly with recommended cleaners to avoid this problem and always wipe dry with a soft cloth.

**DO NOT** - worry if the steel appears to rust. Usually, it's deposits of wire wool scouring pads, plumbers swarf, particles from rusting storage tanks or other deposits on the surface which can be cleaned and rinsed away following your usual cleaning procedure. Bases of washing up bowls can harbour such deposits - check regularly.

**DO NOT** - use coarse grit cleaners or wire wool pads when cleaning the steel. They will scratch the surface.

**DO NOT** - leave carbon steel objects such as bottle openers, scissors, whisks and other kitchen objects standing on the surface for long periods, they can rust and leave marks.

### Cleaning Regime

Problem	Corrective Treatment	Comments
Routine Cleaning.	Washing up liquid, all-purpose cleaning liquid, swab with cloth or sponge rinse well.	Satisfactory on all surfaces.
Oil & Grease Marks.	Degreasing fluid or cellulose thinners.	Rinse with soap & water.
Stubborn marks, stains and light discolouration.	Mild abrasive creams (Cif / Shiny sinks).	Heavy stains can be loosened by soaking with Metsoak or Hi-Phos. Rinse thoroughly after soaking as these products cause rust type marks if left.
Heavy discolouration or heat tint.	Use metal polish (Brasso, Goddard's S/S Cleaner, Bar Keepers Friend) or a light non-metallic abrasive pad. Dura glit.	Use only on grain finish surfaces and work in direction of grain as slight scratching will occur.
Lime Scale	Apply descaler as instructed, agitate & allow to soak, re apply if not fully removed. (Met-soak DX4920 or Hi-Phos)	Bleach solutions including over the counter brands must only be used in dilution as instructed and thoroughly rinse immediately after application as chloride containing compounds will cause corrosion on all grades of stainless steel.  Rinse thoroughly after application and wipe dry as rust type stains can result if left undiluted on surface

There are also products on the market which help to reduce the marks left by fingers and hands one of which is 3m's stainless steel cleaner, also of help is baby oil very lightly applied to the surface.
